The claims are directed toward scheduling a delivery of needed materials. If the materials are not currently available in inventory, a replenishment time period is estimated. The work schedule is created ahead of time based on the anticipated delivery date, taking into account either the actual availability or anticipated availability date of each of the materials. Each new work order is integrated into the overall work schedule as new customer orders are placed. Please see the claims in PG Pub 2002/0103690 (the publication of the instant application).
